EDI **Integration**

Save money with automated business processes

Maximize your supply chain's efficiency by fully integrating electronic replenishment processes. Whether it is for ordering, invoicing or warehouse management, an automated supply chain management will save money and resources every step of the way:
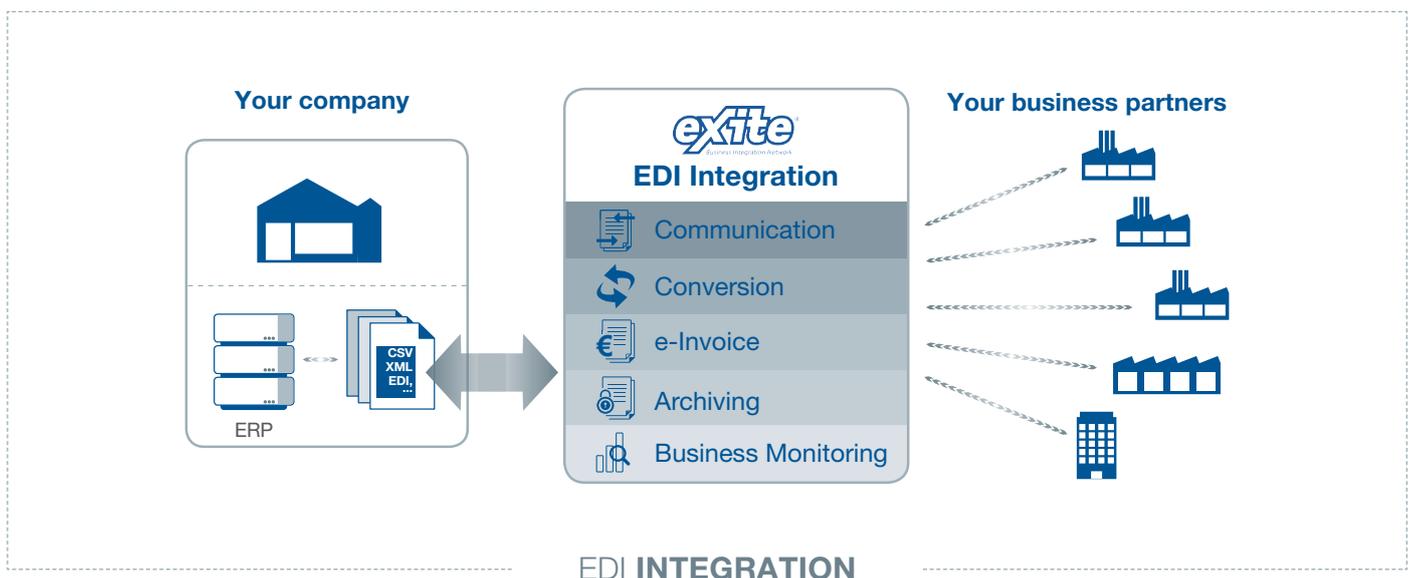

- ❭ Considerably less data processing work
- ❭ Reliable processing thanks to high data quality
- ❭ Improved collaboration with your business partners
- ❭ Increased efficiency in all areas

EDITEL has a wide range of EDI solutions available to facilitate the full integration of all your processes. All our services are customized to meet the needs of our clients.

Depending on your requirements, EDITEL EDI Integration can be provided either as managed EDI service or inhouse solution.

Your benefits

- ❭ Streamlined, cost-efficient process improvement
- ❭ Maximum flexibility
- ❭ Available as managed EDI service or inhouse solution
- ❭ Interface to eXite® EDI Communication
- ❭ Integrated e-Invoice
- ❭ Legally compliant digital archiving
- ❭ Business monitoring
- ❭ Workflow management
- ❭ Platform-independent

EDI **Integration**

EDI Integration Factsheet

Service-oriented design for maximum flexibility

Data Validation

› Validation of data based on
  › Syntax
  › Required content
  › Document comparison
  › Master data
  › Dependencies and conditions
› Validation Reports

Conversion

› Any2Any conversion
  (EDIFACT, CSV, TXT, XML, IDOC, PDF,…)
› Various ERP adapters (e.g. Active IT, BMD
  Business Software, delegate, CSB, MS
  Dynamics, Sage, SAP…)
› Content enrichment (look up tables,…)
› Acknowledgements
› Individual document preview
› Interface to eXite® EDI Communication

Archiving

› Supports all data formats
› Ensures data integrity
› Flexible storage period
› Document search, preview and download
› Manual upload
› Fully audit-proof processes

Security

› Highest security standards
  (encryption, data protection)
› Role-based user access
› PKI-based electronic signature
› Time-stamping

This security module relies on all known security standards and algorithms: MD5, SHA1, SHA2 (SHA256, SHA384, SHA512), PKCS#7, RC4, RSA, DES, 3DES, CRL, and supports the signing and verification of EDIFACT, XML and PDF.

Business Monitoring

› Monitoring and visualization
  of business processes
› Individual reports & notifications
› Workflow for multi-step approval processes
› Supports mobile devices

EDITEL supports you with:

› Comprehensive pre-project assistance and analysis
  of your processes and needs

› Implementation-, mapping services

› Reliable support services for your EDI systems
  during the projects and after going live
