

Web EDI

The cost effective solution for EDI beginners

Web EDI is a great choice for small and medium-sized companies looking to exchange electronic business documents via EDI. The Web EDI portal tradeIT is an exceptionally straightforward and cost-efficient solution. All it takes is internet access. As soon as you have created your account, you will be ready to use EDI and exchange electronic business documents with your business partners. EDI data will be transmitted via the EDI service eXite[®], which ensures that all electronic business documents are delivered and received without fail.

EDITEL's web EDI portal tradeIT is also suitable for retailers who want to reach SME via EDI.

tradeIT supports the exchange of:

- > Article master data (PRICAT)
- Order (ORDERS)
- Order response (ORDRSP)
- Despatch advice (DESADV)
- Receiving advice (RECADV)
 Invoice (INVOIC)

Print SSCC transport labels

If your client requests transport labels with an SSCC code, tradelT also has a very straightforward solution. You can issue SSCC numbers as well as GS1-compliant transport labels directly in tradelT and print them as needed. The information will be taken from the saved despatch advice data.

This despatch advice data can also be printed and enclosed with your shipment as a paper despatch advice. This process simplifies merchandise receipt on the client's side and makes sure you can safely trace your articles at all times.

Available as app

Web EDI users have the option of accessing their order data on the go whenever they want: all you have to do is download the "EDITEL Mobile Web EDI" app from the iTunes App Store or from the Google Play Store to your smartphone or tablet.
